Back to School Safety

August is “Back to School Safety Month”! College is a big step in many student’s life. Living in dorms is exciting and scary. There are more than 3,500 fires on college campuses every year. Help prevent fires by understanding electrical safety and sharing what you know with loved ones. There are a few things you can do to help keep

- ~Keep all electrical appliances and cords away from bedding, curtains, and other flammable materials.
- ~Use lightbulbs with the correct wattage for lamps. If there is no indication on the fixture don’t use a bulb with more than 60 Watts
- ~Unplug small household appliances when not in use.
- ~Extension cords are for temporary situations only.
- ~Never plug more than one high wattage appliances into a single outlet.
- ~Always use microwave-safe containers. Glass, ceramic containers, and plastics labeled “microwave-safe” should always be used. Metal and aluminum foil can damage the microwave or start a fire.

Energy Conservation Rewards

Did you know about 30% of a home's energy is lost through windows? Losing energy in a home equals losing money in your wallet. CWEC wants to help members save money by providing rebates for upgrading their home to save energy. This includes weatherizing your home! We will give you \$25 back for new windows and doors up to \$250. We also offer 50% off insulating your home up to \$250. New doors and windows aren't the only rebates members can receive. Members can also enjoy rebates for LED lighting, heating and cooling upgrades, and much more. For more information, visit our website, and click on Energy Conservation Rewards under the Member Services tab.

About **30%** of a home's energy is lost through windows

CWEC Commitment to Community

Central Wisconsin Electric Cooperative continues their commitment to community by changing out street lights in Tigerton Wisconsin. CWEC are replacing the 150 Watt high pressure salt bulbs with energy efficient 82 Watt LED bulbs. The two part project started with replacing 100 street lights. The lights are Department of Transportation approved, which means that the bulbs are designed to be used as streetlights, and cause less glare to drivers on the road. The second part of the project will be replacing 64 lights in the Stockbridge-Munsee housing. This project will help save the town and tax payers money on electricity.

Lineman John Bestul replaces the old lights with new, more efficient, LED lights
