

**Distributed Generation  
Small General Service Schedule  
Rate DGCOM**

**AVAILABILITY**

Available for single or three-phase electric service to farm and small commercial distributed generation members with maximum demands of 75 kW or less, choosing to significantly self-generate, that is, to provide over 50% of their own power, the member will be served under provisions of a rate schedule that charges the Cooperative's full cost of service for that type of installation. If said small commercial distributed generation member provides under 50% of their own power, the member will be serviced under provisions of their original Small General Service rate schedule. Irrigation pivot systems are allowed under this rate schedule

Where a residence and business are combined in one service, this rate only applies if 50% or greater of the use is for commercial purposes.

**TYPE OF SERVICE**

Single or three phase, 60 Hertz, at Cooperative's standard secondary voltages.
